**PEDICULOSIS
(Head Lice)**

The Board of Education believes the key to controlling pediculosis in BOCES is parental notification and treatment of their children with rigorous enforcement by BOCES personnel before readmission to school.

Students who have been identified as having head lice will not be allowed to attend school until proper treatment has been instituted. Students will only be readmitted to a BOCES program with proof that they have received treatment and been re-examined by BOCES personnel.

Adoption date: July 15, 2013
