

STUDENT HEALTH SERVICES REGULATION

A. Immunization Against Communicable Diseases

Under state Public Health Law 2164, in order to be enrolled in or attend BOCES, children must be fully immunized against certain communicable diseases. Those diseases are: poliomyelitis, mumps, measles, diphtheria, rubella, varicella (chicken pox), Haemophilus influenzae type b (Hib), pertussis, tetanus, pneumococcal disease, and hepatitis B.

“Fully immunized” means that the child has either (1) received the required vaccinations for these diseases as set forth in state regulations; (2) for measles, mumps, rubella, hepatitis B, poliomyelitis, or varicella only, shown immunity with a positive blood test for those disease antibodies; or (3) for varicella only, has had the disease, verified by a physician, nurse practitioner, or physician’s assistant.

Children who are not fully immunized may only be admitted to BOCES if they (1) are in the process of receiving immunization or obtaining blood tests; or (2) have been granted a medical or religious exemption.

B. Administering Medication to Students in BOCES

The administration of prescribed medication to a student during BOCES hours is permitted only when the medication is necessary to allow the student to attend BOCES or failure to administer the medication would seriously affect the student’s health.

Parent(s) or guardian(s) must present the following information:

1. a written order from a NYS licensed health care provider (e.g. physician, nurse practitioner or physician assistant) containing the following: student’s name, the date and name of the medicine, dosage and time to be administered, and list of possible side effects; and
2. A written note from the parent/guardian giving appropriate licensed BOCES personnel permission to administer the medication to their child during BOCES or for trained unlicensed personnel to assist their child in taking their own medication

Students who may carry and use certain medications

Students are permitted to self-administer medication under certain circumstances, in accordance with state law and regulation. A student is authorized to carry and use the following medications: rescue inhaler, epinephrine auto-injector, insulin, glucagon (and associated diabetes testing supplies), if the following conditions are met:

1. An authorized medical provider must provide written permission that includes an attestation that the student’s diagnosis requires the medication; the student has demonstrated that he/she can self-administer the prescribed medication effectively; the name of the medication, the dose, the times when it is to be taken, the circumstances which may warrant use and the length of time during which the student may use it.

2. Written parental permission.

If a student is authorized to carry and use medication as described above, the parent/guardian is permitted to give extra medication and supplies that the district shall maintain in accordance with the written directions submitted by the authorized medical provider.

All documents pertaining to student medication shall be kept on file in the nurse's office.

The BOCES nurse shall develop procedures for the administration of medication, which require that:

1. all medications shall be administered by a licensed person unless the child is self-directed;
2. medications, other than as noted above, shall be securely stored in the office and kept in their original labeled container, which specifies the type of medication, the amount to be given and the times of administration; the BOCES nurse shall maintain a record of the name of the student to whom medication may be administered, the prescribing physician, the dosage and timing of medication, and a notation of each instance of administration; and
3. all medications shall be brought to BOCES by the parent(s) or guardian(s) and shall be picked up by the parent(s) or guardian(s) at the end of the school year or the end of the period of medication, whichever is earlier. If not picked up within five days of the period of medication, the medication shall be discarded.

An adult must bring the medication to BOCES in the original container. The administering staff member should clearly label the medication with the time to be given and dosage.

Sunscreen. Students are permitted to carry and apply sunscreen without a medical provider's order under the following conditions:

1. the sunscreen is used to avoid overexposure to the sun and not for medical treatment of an injury or illness, if sunscreen is required to treat a medical condition, the procedures for administering medication (above) apply;
2. the sunscreen is FDA approved for over the counter use;
3. the student's parents or guardians provide written permission annually for the student to carry and use the sunscreen.

The BOCES nurse shall keep written permission for students on file and develop procedures pertaining to this policy.

Administering medication on field trips and at after-school activities. Taking medication on field trips and at after-school activities is permitted if a student is self-directed in administering their own medication. On field trips or at other after-school activities, teachers or other BOCES staff may carry the medication so that the self-directed student can take it at the proper time.

If a student is going on a field trip but is not self-directed (i.e., fully aware and capable of understanding the need and assuming responsibility for taking medicine), then the district may:

- permit the parent or guardian to attend the activity and administer the medication.
- permit the parent to personally request another adult who is not employed by the BOCES to voluntarily administer the medication on the field trip or activity and inform the BOCES in writing of such request.
- allow the student's health care provider to be consulted and, if he/she permits, order the medication time to be adjusted or the dose eliminated.

If no other alternative can be found, a BOCES nurse or licensed person must administer the medication.

Administering epi-pen in emergency situations. The administration of epinephrine by epi-pen has become an accepted and extremely beneficial practice in protecting individuals subject to serious allergic reactions (e.g., individual has an anaphylactic reaction to a wasp sting or the ingestion of peanut butter).

BOCES shall stock epinephrine auto-injectors to be used on any student or staff member having symptoms of anaphylaxis, whether or not there is a previous history of severe allergic reaction. Pursuant to Public Health Law §3000-c, the district shall establish a collaborative agreement with an emergency health care provider to allow for use of epinephrine auto-injectors in BOCES. The collaborative agreement shall outline the protocols and procedures for the use of the auto-injectors. The medical director shall oversee the program; ensuring implementation of the terms of the collaborative agreement and that designated staff are appropriately trained.

In addition, pursuant to SED guidelines, BOCES nurses may provide training to unlicensed BOCES staff in administering epi-pens, epinephrine auto-injectors and glucagon prescribed by a licensed medical provider, to a child who has been diagnosed with the associated disease in accordance with the process described in this policy and regulation.

Use of Albuterol Metered Dose Inhalers. Students diagnosed with asthma whose personal albuterol prescription is empty may receive an emergency dose of BOCES-stocked albuterol under the following conditions:

- The student has a prescription ordering albuterol MDI or nebulized albuterol from their licensed health care provider which must include an order allowing the student to use the BOCES stocked albuterol MDI if their personal prescription is empty;
- The student's parent/guardian must provide written permission for the student to be administered dosing from the BOCES stocked albuterol MDI if their personal prescription is empty;
- The BOCES stock supply of albuterol is not to be used in place of the parent/guardian providing the medication for their child to the BOCES. The BOCES stock supply is for use only in the event that the student's personal supply is empty while awaiting the parent/guardian to provide the BOCES with a new one; and
- The student must have their own labeled spacer, tubing and facemask, or mouthpiece provided by the parent/guardian that is used when administering their own or the BOCES stock albuterol MDI.

Specific procedures shall be developed by BOCES health personnel that must outline the following:

1. The process for obtaining and replacing the stock albuterol;
2. The maintenance and cleaning of the BOCES stock MDI and nebulizer; individual students' MDIs and spacers; and/or students nebulizer tubing, facemask or mouthpiece;
3. The protocol for informing parents that the BOCES stock albuterol was used; and
4. The protocol for informing parents/guardians of the need for replacement of their child's albuterol medication along with any district imposed deadlines for doing so.

This procedure must be approved by both the district medical director and the board of education.

Opioid Overdose Prevention

The BOCES medical director has issued a non-patient specific order to the school nurse to administer Naloxone on-site. As a result, the medical director, in collaboration with BOCES administration, has acquired and provided Naloxone to BOCES for use in its schools. The BOCES nurse will, in his/her individual discretion, and in collaboration with the medical director, choose the route of administration of the Naloxone. The medical director is responsible for having approved policies in place for re-ordering Naloxone in the event it is administered and to ensure that an adequate supply is continuously available in the buildings for use. Similarly, the administration of Naloxone to any student will be documented in his/her cumulative health record and for staff members, in their personnel file.

Storage and Inventory

BOCES will store its supply of Naloxone in a secure, but accessible, and temperate location consistent with its emergency response plan. The BOCES nurse or personnel designated by the BOCES administrator will inventory the supply of Naloxone on a weekly basis and record this information on a log which will be developed and/or maintained by the BOCES nurse or other designated personnel/administrator. This record of information will include the date, time, and signature of the designated personnel performing the inventory.

C. Student Medical Exams

In accordance with Sections 903 and 904 of the state Education Law, each student must have a physical exam given by the BOCES doctor or licensed health provider (including a physician, physician assistant or nurse practitioner) upon entrance to BOCES and at grades pre-kindergarten or kindergarten, two, four, seven and ten. Findings are to be kept on record at the BOCES on forms that can be obtained from the BOCES nurse. In addition, the BOCES must request a dental health certificate according to the same schedule.

A student may be excluded from the medical examination requirements because the child's parent/guardian holds a genuine and sincere religious belief which is contrary to medical examinations. The request for exemption must be in writing to the principal or his/her designee.

In the event that the student's medical history reveals that they have a known life-threatening allergy, the BOCES nurse, in conjunction with the family, student, child's teacher, and other

appropriate staff, shall develop and implement an individual health care plan which shall guide prevention and response.

The district shall work with students in the self-management of their life-threatening allergy, or other chronic health conditions, by:

1. Adequately training staff involved in the care of the child.
2. Assuring the availability of the necessary equipment and/or medications.
3. Providing appropriately licensed and trained persons on BOCES premises, as required by law.
4. Providing ongoing staff and student education.

D. Illness or Injury in BOCES

If a student becomes ill or injured in BOCES:

1. The nurse must determine if the student should receive further medical attention, remain in the dispensary or return to class.
2. The nurse must call the parent, guardian or designated emergency contact if he/she feels the student should go home. In general, a parent or guardian shall pick up the student from BOCES.
3. The nurse must contact the Building Principal if he/she feels the child should be transported by bus to the home.
4. If there is to be a change in bus routing in order to carry the student to his/her home, that decision must be made by the administrator and the transportation supervisor.
5. If the route is to be changed, the transportation supervisor shall inform the bus driver.
6. If no parent, guardian or designated emergency contact picks up the student at BOCES, or if no parent/guardian or designated emergency contact is home, the student shall remain in the nurse's office until such time as a parent, guardian or designated emergency contact becomes available to assume responsibility for the child.
7. If the nurse determines that the child can return to class, but needed some type of medical attention (i.e., a bandage for a minor scratch, a brief rest, etc.), the nurse shall notify the parent.
8. The nurse must maintain appropriate records of all student visits.

E. Medical Emergency Record

All students must have on file a medical emergency record which shall state the name and telephone numbers of the following:

1. the student's parent(s) or guardian(s) at home and work;
2. the student's next of kin;
3. a neighbor;
4. the student's licensed health care provider;
5. preferred hospital;
6. any allergies or serious health conditions.

Students diagnosed with diabetes shall have a written diabetes management plan maintained as part of the student's cumulative health record. The management plan shall be developed in

accordance with state regulation and district procedures. Students diagnosed with asthma or other respiratory disease requiring a rescue inhaler, students diagnosed with life-threatening allergy or diabetes may have an emergency action plan maintained as part of the student's cumulative medical record. The emergency action plan shall be developed in accordance with state regulation and district procedures.

F. Student Return to BOCES after Illness/Injury

In general, students should be symptom-free before returning to BOCES and resuming normal activities. In some instances, students may be asked to provide a note from their licensed health care provider before they return to BOCES or participate in the full range of BOCES activities. The final decision to permit participation rests with the BOCES physician. The Superintendent, or his/her designee, in consultation with the BOCES physician, nurse and other appropriate staff, shall develop protocols to address a student's return to activities when there has been a serious illness or injury.
